CORONAVIRUS FOR PARENTS

DO NOT send your child to our setting if they, or anyone in the household, has:

a continuous new cough

Coughing and coughing a lot

or

loss of sense of taste or smell

Can be hard to spot in children

If your child has ANY of these symptoms, STAY AT HOME (SELF-ISOLATE) and BOOK A COVID-19 TEST for them

While you are SELF-ISOLATING

go out of the house

Apart from to get a test

Invite visitors to your home

Do not invite anyone round

meet your support bubble

Even with a mask on

If your child has a

NEGATIVE TEST RESULT they are feeling better

and

you have shared your test result with your child's setting

and

your child is well enough to manage the normal daily routine

You can STOP ISOLATING and they can RETURN TO THE SETTING

If your child has a

POSITIVE TEST RESULT

YOU MUST

Inform your setting and isolate your child for

10 days

from when symptoms started

Share close contact details with NHS Test and Trace

AND

Con isol **AND** fam

Continue to isolate as a family for 10 days

If someone in your household

has a

POSITIVE TEST RESULT

YOU MUST

Inform your child's setting and keep your child at home

Self-isolate as a family AND for 10 days

AND

Not send your child to the setting with someone else

If you are contacted by NHS Test and Trace as a 'close contact'

Inform your - child's setting and isolate for

10 days

Not leave the house to bring your child to the setting

AND

Give details of close contacts to NHS Test and Trace

AND

The above information was correct at 18.12.20. Please contact your Local Public Health Team for more information:
